-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Status of Claims***

1. The preliminary amendment filed 07-14-2004 has been entered. Claims 1-6 are pending.

### ***Drawings***

2. Figures 1-3b should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

3. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Regarding claims 1-2, it is unclear which "seal format" is being claimed, and it is further unclear as to which elements of the invention the "seal format" includes and/or represents.
5. It is unclear if the "common gland member" recited in claim 2 is referencing the "gland member" previously recited in claim 1.
6. It is unclear if the "machining operation" recited in claim 4 is referencing the "machining operation" previously recited in claim 3.

Art Unit: 3677

7. Regarding claim 6, the phrase “barrier media communication hole” lacks antecedent basis and thus renders the claim incomplete as to the structural cooperation between this hole and the seal.

***Claim Rejections - 35 USC § 102***

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-6, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by DE3507819 (hereinafter “DE819”).

10. DE819 discloses a seal with a gland member 1 that is interchangeable (see abstract) and thus common to more than one “sealing format”. The gland has a radially outward diameter, being viewed and labeled as the “material holding diameter”. The gland includes an internal recess 7 adjacent to port 23 being viewed and labeled as a “barrier media communication hole.”

11. Regarding claims 3-5, the applicant is reminded method limitations, such as a machining operations, are given little patentable weight in an article claim as the patentability of a product does not depend on its method of production. See MPEP 2113.

***Conclusion***

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
